Dinosaurs

Here are some fun facts about dinosaurs:

There were no humans during the Jurassic period.
When the first humans lived on earth, dinosaurs were extinct.

Fossils of dinosaurs have helped us to learn about them.
Their footprints tell us about where they lived.

Dinosaurs laid eggs like birds.

Some ate other dinosaurs. They were carnivores.
Others ate only plants. They were herbivores.

The extinction of the dinosaurs is a great mystery.
However, scientists have many theories.
From the fall of a meteorite to the ice age.

There were many different kinds of dinosaurs:

For example, the Triceratops had the three horns on its face.
Paleontologists believe that the T-rex had feathers.
The brontosaurus was longer than a bus.
The Stegosaurus had a large body, but their brain was as small as a golf ball.
And of course, Pterodactyls could fly.
